- *Management reporting to ensure compliance, monitoring and cost control*
- *Expert account managers available to help you manage records effectively*
- *Over 75 years of experience protecting and maintaining confidential information*
- *Millions of records processed, retrieved and filed annually*

Overview

At The Quinlan Companies, we provide a complete menu of services including customized and specialized records storage. We also provide electronic data imaging and document scanning solutions. Our technologically trained staff can digitize your radiology and mammography films for digital reading comparisons from year to year. We continue to develop and implement leading edge technology, security, destruction and disaster recovery solutions.

The Quinlan Companies support a variety of industries in records management including healthcare, legal, insurance, financial services and any businesses that require a high level of records management, protection and confidentiality.

History of the Quinlan Companies

The Quinlan Companies, based in Providence, RI, originally began as an x-ray film reclaiming business in 1932 by two brothers Aubrey and Clark Quinlan. Today the business is in the hands of the third generation of Quinlans. The company has expanded its solutions to include a wide array of products and services in records management, document storage, reclamation and photo waste management as well as film and records digitalization.

In 2007, The Quinlan Companies added three new storage locations in Florida, Maryland and Texas. These acquisitions allowed us to expand our service area to support new customers nationwide. These additional locations also provide a great platform for the continued evolution and expansion of our digital initiative for digital records, mammography and radiology films.
